EME

Operating Instructions

Requirements:

1. Apple II+, IIe, IIc with memory of 48K or more.
2. One disk drive.
3. Monitor (color desirable but not essential).

To start:

1. Be sure monitor and computer are plugged into a 110-volt power supply.
2. Insert one disk in the disk drive. Close the door. Keep the other disk (back-up) in a safe place.
3. Turn on monitor. Turn on computer (switch at rear left). If red light on disk drive comes on, program is loading. If computer is already turned on you may proceed as follows:

   Apple II+: Type PR#6 (if controller card is in slot 6) and press RETURN.

   Apple IIc and IIe: Hold down CONTROL and OPEN APPLE keys, then press RESET. Make sure CAPS LOCK key is down.
4. Once the program starts running, instructions such as PRESS RETURN, → or ← appear on the screen telling how to proceed.

To end:

1. Check with your instructor to see if computer and monitor should be turned off.
2. Remove disk, carefully insert in its jacket and store in a safe place away from temperature extremes and magnetic fields.
